

FEDERAL - EPBC Act

1. Referrals open for comment
Cape Cleveland, Townsville sand extraction industry – comments due by Tuesday 29th September
2. Decisions and Preliminary Documentation on referrals
Hay Point Coal Terminal Expansion – Preliminary documentation open for comment due Wednesday 7th October
3. Wildlife trade and conservation invitations for comment
Importation of two varieties of scarabaeine dungbeetle for release as a biological control agent – comments due Friday 6th November
4. Other notices
Great Barrier Reef Outlook Report 2009 available for viewing

STATE

- Kevin's Corner coal mining project – declared a significant project
Queensland Curtis LNG project – submissions on the EIS by Monday 19th October
Gladstone Steel Making Facility – submissions on the draft Terms of Reference by Monday 12th October

FEDERAL - EPBC Act

All of the information below is drawn directly from the Commonwealth Government's website (www.environment.gov.au/epbc/index.html) and is provided for information and summary purposes only; EDO-NQ does not warrant or guarantee its accuracy or correctness. In addition, EDO-NQ does not support the various proposals which are the subject of the EPBC Act referrals below.

1. Referrals open for comment

2009/5087	BM Webb Holdings Pty Ltd/Mining/Cape Cleveland/QLD/Staged sand extraction, Lot 1 on RP733021, 203 Carty Road	Invitation for Public Comment on Referral	Comments due: 29 Sept
-----------	--	---	-----------------------

The proposed action is a staged extractive industry of approximately 1.7 million cubic metres of clean medium-fine sand from an area of 65.7ha adjacent to the Bowling Green Bay National Park at Cape Cleveland, Queensland. The proposed extractive industry is located 2.3 km upstream from the Great Barrier Reef and adjacent to the Bowling Green Bay Wetlands. 22 threatened species and 32 migratory species may be found within the area.

The referral concludes it will not have a significant impact on matters of national environmental significance.

2. Decisions and Preliminary Documentation on referrals

2009/4759	BM Alliance Coal Operations Pty Ltd/Transport - Water/Port of Hay Point/QLD/Hay Point Coal Terminal Expansion	Notification of Publication of Preliminary Documentation	Date of notice: 10 Sep 200
-----------	---	--	----------------------------

Located approximately 38km south of Mackay the terminal expansion includes dredging works, offshore blasting, disposal of dredge material, land reclamation and infrastructure construction. This proposed action is a “controlled action” as it is likely to have a significant impact on five matters of National Environmental Significance.

Assessment of the project will be via preliminary documentation. Members of the public are invited to view the documents and make **comment by 5pm Wednesday 7th October, 2009.**

3. Wildlife trade and conservation invitations for comment

[Draft environment assessment report for the importation of *Onthophagus vacca* \(a scarabaeine dung beetle\) for release as a biological control agent](#)

[Draft environment assessment report for the importation of *Bubas bubalus* \(a scarabaeine dung beetle\) for release as a biological control agent](#)

CSIRO Entomology has prepared draft environment assessment reports to include two varieties of scarabaeine dungbeetle on the live import list for release into the Australian environment to enhance cattle dung burial, and thus limit reproduction of the Australian Bush Fly (*Musca vetustissima*). Comments are invited on the draft report by **Friday 6th November.**

4. Other Notice

Now available for viewing are copies of the Great Barrier Reef Outlook Report, the Commonwealth and Queensland Governments’ response and the Reef Water Quality Protection Plan on the Departments website.

STATE PROJECTS

1. Significant Projects in Northern Queensland

A proposed action that has been referred under the EPBC Act may be declared by Queensland’s Coordinator-General to be a “state significant project” under the State Development and Public Works Organisation Act 1971 (Qld) and an Environmental Impact Statement may be required by the Queensland Government under that Act.

The Commonwealth and Queensland Governments have entered into a Bilateral Agreement which allows Queensland to carry out the Commonwealth’s environmental assessments in certain circumstances.

The community are entitled to make submissions in relation to the environmental assessments, whether at Commonwealth or Queensland level.

All of the information below is drawn directly from the Queensland Government’s website (www.dip.qld.gov.au/projects) and is provided for information and summary purposes only; EDO-NQ does not warrant or guarantee its accuracy or correctness. In addition, EDO-NQ does not support the various proposals which are the subject of review.

Kevin's Corner Project

Queensland's Coordinator-General declared the new coal mining project a significant project on Thursday 10th September. The project is located adjacent to the Alpha Coal project approximately 360 kilometres south-west of Mackay. Kevin's Corner will be assessed separately, although there is some overlap with the Alpha Coal project rail line and port.

Hancock Prospecting Pty Ltd's proposes to establish a 30 million tonne per annum coal mine in the Galilee Basin, central Queensland, to service international export markets for thermal coal.

The first opportunity for public comment will be when the draft terms of reference for the EIS are released in coming months and then more significant opportunity for public comment when the EIS is released.

Queensland Curtis LNG project

The project proposes to develop an integrated liquefied natural gas project in Queensland comprising :

- expansion of coal seam gas operations in the Surat Basin
- development of a gas and water pipeline network
- development of the liquefied natural gas processing and export facility on Curtis Island.

On 4 July 2008, the Coordinator-General declared the project to be a 'significant project' for which an environmental impact statement (EIS) is required in accordance with Part 4 of the *State Development and Public Works Organisation Act 1971 (Qld)* (SDPWOA). The Department of Infrastructure and Planning will manage the EIS process on behalf of the Coordinator-General.

Written submissions on the EIS are invited from the public by **5pm Monday 19 October 2009**.

Gladstone Steel Making Facility

Boulder Steel Limited is proposing to construct and operate an integrated steel making plant at a site within the Aldoga Precinct of the Gladstone State Development Area in Central Queensland. The plant will produce high quality steel for export to overseas finishing plants.

On 3 April 2009, the Coordinator-General declared the Gladstone Steel Making Facility to be a significant project for which an environmental impact statement (EIS) is required under Part 4 of the *State Development and Public Works Organisation Act 1971 (Qld)*. On 23 June 2009, the Commonwealth Minister for the Environment, Heritage and the Arts determined the project is not a controlled action and therefore will not require assessment under the *Environment Protection and Biodiversity Conservation Act 1999 (Cwlth)* (EPBC Act).

The draft TOR is available for public review and written comments are due by **5pm Monday 12th October 2009**.
